Winterschool on Analysis and Applied Mathematics

February 22–26, 2021 | Münster, Germany

The scope of the Winter-school is to offer an overview of modern themes in Applied Mathematics, ranging from modeling issues in physics and materials science to their mathematical analysis by means of advanced techniques in the theory of PDEs and the Calculus of Variations.

Speakers

Andrea Braides (Rome)

Felix Otto (Leipzig)

Lucia Scardia (Edinburgh)

Ulisse Stefanelli (Vienna)

Organizers

Manuel Friedrich

Leonard Kreutz

Registration

School participation is free of charge, but a registration is required. Please register by sending an email to **am.symposium@uni-muenster.de** and indicate if you want to present a poster. Financial support is available for a limited number of young researchers *(deadline November 30, 2020).*
